

Adobe CS5 New Features - Web Premium

This one-day interactive session provides users, already familiar with aspects of Adobe Creative Suite, with an overview of the new features available in Adobe Creative Suite CS5.

This course focuses on Adobe Dreamweaver and Adobe Flash Professional CS5 applications.

New Feature Highlights

Adobe Dreamweaver CS5

Integrated CMS support

- Support for content management system frameworks such as WordPress, Joomla! and Drupal

CSS inspection

- Visually display the CSS box model in detail without reading code or requiring separate utilities

Integration with Adobe BrowserLab

- Preview dynamic web pages and local content with multiple viewing, diagnostic and comparison tools through integration with Adobe BrowserLab

CSS properties toggle

- Disable and re-enable CSS properties directly from the CSS Styles panel

Enhanced support for Subversion

- Manage site files more effectively in collaborative, version-controlled environments with enhanced support for Subversion software

PHP custom class code hinting

- Display proper syntax for custom PHP functions to help you write code more accurately

Simple site setup

- New Site Definition dialog box and add multiple servers with custom names for staged, networked or other site types

Adobe Flash Professional CS5

New text engine

- Use print-quality typography via the new Text Layout Framework. Work with columns and bi-directional text

XML-based FLA source files

- Manage and modify projects using source control systems and collaborate on files more easily

Code Snippets panel

- Quickly include functional code for timeline navigation, actions, animation, audio/video and event handlers

Enhanced ActionScript editor

- Increase development speed with an improved ActionScript editor, including custom class code hinting and code completion

Adobe Flash Builder integration

- Use Flash Builder as your primary ActionScript editor for Flash Professional projects

Spring for Bones

- Create more realistic inverse kinematic effects with new motion attributes added to the Bones tool

Video improvements

- Streamline video embedding and encoding processes with on-stage video scrubbing. Play back FLV components directly on the stage

Deco drawing tools

- Add advanced animation effects with a new comprehensive set of brushes for the Deco tool. Quickly create movement for particle phenomena like clouds or rain.

Course Information

Course Prerequisites

Before taking this course, students should be familiar with the use of the following Adobe Creative Suite CS3 or CS4 applications:

- Adobe Dreamweaver
- Adobe Flash Professional

Additional Information

Courses can be run on Windows and Macintosh platforms and can be tailored to meet customers' requirements. Courses are run in Edinburgh and Glasgow and at client's sites throughout the UK

Course Duration

1 Day
